3.3 Declaration by Applicant on Unit Trust Financing Risk Disclosure Statement

3.3.1 The Applicant should assess if financing is suitable for the Applicant in light of the Applicant's objectives, attitudes to risk and financial circumstances. The Applicant should be aware of the risks, which would include the following:

(a) the higher the margin of financing (that is, the amount of money the Applicant borrows for every Ringgit of the Applicant's own money that the Applicant puts in as deposit or down payment), the greater the potential for losses as well as gains.

(b) the Applicant should assess whether the Applicant has the ability to service the payments on the proposed financing. If the Applicant's financing is based on variable rate, and if rate of returns/interest rates rise, the Applicant's total payment amount will be increased.

(c) returns on unit trusts are not guaranteed and may not be earned evenly over time. This means that there may be some years where returns are high and other years where losses are experienced. Whether the Applicant eventually realise a gain or loss may be affected by the timing of the sale of the Applicant's units. The value of units may fall just when the Applicant wants the money back even though the investment may have done well in the past.

3.3.2 This brief statement cannot disclose all the risks and other aspects of financing. The Applicant should therefore carefully study the terms and conditions before the Applicant decides to take financing. If the Applicant is in doubt about any aspect of this risk disclosure statement or the terms of the financing, the Applicant should consult the institution offering the facility.
